accurate mileage capture

saving time +
saving money

mileage
count

the easier way to
count their miles and cut your costs

Managing mileage claims for a fleet of cars can be daunting. MileageCount makes it easy, for drivers as well as employers.

MileageCount's smart technology tracks every mile of every journey, in any vehicle: accurately, reliably, and simply. Its integrated system then makes it easy to submit, manage and process those mileage records – saving hours of paperwork.

A smart solution that soon adds up

By saving administration time, it saves you money. By reporting with accuracy, it avoids costly estimations and compliance penalties. And by organising and displaying the data clearly, it helps you identify ways to streamline your operations even further.

Helping over 25,000 fleets and counting

MileageCount is already helping over 25,000 fleets of cars manage their mileage and mpg, simplify their auditing, and save them money – whilst ensuring HMRC guidelines are met.

Count the savings

Every company mile matters. Estimates, rounded-off figures, mistakes, and unrecorded journeys won't do. You simply can't afford to hope all forms are complete and accurate. And with MileageCount you don't have to. Every mile is counted and reported, automatically and accurately.

Industry research figures show MileageCount can reduce business mileage claims by up to 24%. And you can start counting the savings as soon as the system's installed, for just a few pounds a month per driver.

Avoid the costs

MileageCount doesn't just help you count the savings; it helps you avoid serious costs.

HMRC requires complete, accurate mileage reporting. Every journey incorrectly reported and every mile over-claimed is not just an unnecessary expense, it could also expose you to the risk of HMRC investigation and penalties. If HMRC find your records are lacking accuracy, they can fine you going back six years. MileageCount could help you avoid all fines related to mileage records.

And save more than just money

Legislation governing vehicles and drivers also requires you to stay on top of servicing, licences, tax and insurance. MileageCount saves you from an administration headache, and helps you manage all these requirements effortlessly too.

Whatever your size or type of fleet, whatever your mix of vehicles, size and fuel type, MileageCount gives you five valuable fleet management solutions seamlessly integrated into one system:

1 mileage capture and reporting

2 finance and tax service

3 duty of care compliance

4 fleet cost control

5 grey fleet management

Combined, these five solutions deliver on-going savings in time, effort, and cost:

- Reduces fleet costs

- Automates administration

- Meets HMRC guidelines

- Shrinks fraud exposure

- Tracks efficiency

five fleet management solutions, one easy system

Advantages your company can count on

You have a company to grow, not a fleet to babysit. MileageCount gives your company fast, quantifiable, and assured return on investment for any size or type of fleet. It can reduce business mileage claims by up to 24% for just a few pounds a month per driver, and give you management control effortlessly.

MileageCount helps reduce your company spend on fuel, shrink expense claims, and manage both internal and HMRC reporting. Furthermore, it proves your company's sustainability from ESOS energy reporting to comprehensive emissions monitoring – accurately and easily.

- Assured return on investment: fast and quantifiable

- Accountability and compliance: clear and unequivocal

- Full accurate reporting: mpg, emissions and ESOS

- Straightforward integration: with almost any system, including fuel cards and telematics

advantages
your drivers
can count on

You employ drivers to drive, not to sit at the roadside
completing complex and time-consuming forms.
MileageCount makes it easy for them to record every
trip and upload data, saving hours in lost work-time.

The risk of error is also greatly reduced when using
MileageCount. Drivers no longer have to guess
unrecorded mileage, or add up multiple long journeys.
Data capture is all automatic, which means fast and
stress-free mileage submission.

MileageCount offers a range of driver recording
options, all with latest technology benefits. Drivers
can use a simple GPS dongle plugged into their car,
then into their office or home computer, to create a
report in minutes. Or, they can use an Android or iOS
app for easy SmartPhone recording and download
of journeys. Furthermore, our iOS platform now
includes unique fully automated mileage recording,
using revolutionary iBeacon technology –
please contact us for more information.

**"Implementing the MileageCount solution has made
collating mileage easier for the drivers and allowed
Saville to produce accurate management reporting."**

Saville Audio Visual

**"MileageCount drives innovation and supports our
customers with the pressures and complexities of
managing a fleet of vehicles."**

Andy Allen, UK Cards Manager, BP Fuel

**"The benefits of MileageCount are proving to be
considerable with reduced fuel spend and increased
private mileage declaration at the forefront."**
